Recruitment Team

Accenture India

IIT Roorkee – Campus Placement Portal

Subject: Application for Analyst Role – Campus Opportunity at Accenture

Dear Hiring Team,

I am writing to express my enthusiastic interest in the Analyst role at Accenture, as listed through the IIT Roorkee campus placement portal. As a third-year B.Tech student in Metallurgical and Materials Engineering at IIT Roorkee, I am eager to contribute to a firm that is globally recognized for driving innovation, creating 360° value, and transforming industries with the power of technology.

During my internship with MAY8WEB, I engineered a secure full-stack registration and payment portal using PHP, JavaScript, and MySQL—integrating OTP verification, user dashboards, and real-time status tracking. At AS TRADING, I improved a live government healthcare portal, streamlining its backend using the CodeIgniter PHP framework. These experiences have not only sharpened my technical abilities but also taught me to think analytically, adapt quickly, and deliver solutions under pressure—values that resonate strongly with Accenture's agile and client-focused culture.

I am particularly inspired by Accenture's commitment to cloud, AI, and digital transformation across industries. I believe my combination of engineering discipline, hands-on technical experience, and drive to innovate would allow me to meaningfully contribute to Accenture's mission of delivering measurable impact at speed and scale.

Thank you for considering my application. I look forward to the opportunity to further discuss how my background and aspirations align with Accenture's vision. It would be a privilege to grow and contribute as part of such a dynamic, forward-looking team.

Warm regards,

Raj Rabidas

B.Tech, Metallurgical and Materials Engineering

Indian Institute of Technology, Roorkee
